**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 26-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanaya et al. (US 6517175) in view of the Applicant's admission as prior art.

Kanaya et al. discloses a printer system comprising a printer and an ink supply (*FIG. 4*), the printer arranged to print a location pattern comprising a plurality of dots (*FIG. 19*) adapted to be read by a pattern reader (*FIG. 4, element 38*), the system being further arranged monitor a variable associated with the printing process and to modify the size of the dots in dependence upon the monitored variable (*FIGs. 14 and 26: The size of a dot is corresponding to the amount of ejected ink forming the dot*), wherein the monitored variable is the ambient temperature or humidity (*column 3, lines 35-43: The temperature measured by the temperature sensor 37 is taken into account to calculate the ejecting amount of ink*).

Kanaya et al. however does not teach wherein the pattern reader is an external digital pen configured to read the location pattern and write using human readable ink when operated by a user.

The Applicant, on pages 3-4 and FIG. 2, admits that a pattern reader that is an external digital pen configured to read a location pattern and write using human readable ink when operated by a user is well known in the art.

Therefore, it would have been obvious for one having ordinary skill in the art at the time the invention was made to modify Kanaya's printing system to include an external digital pen operating in a manner well known in the prior art, such as reading the pattern location and writing human readable ink, as admitted by the Applicant.

***Response to Arguments***

Applicant's arguments with respect to claims 26-27 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
